DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record is considered to teach, suggest or render obvious the invention of claim 7.

Hasebe does not teach or suggest the nickel metal hydride battery as defined in claim 1 including a bag-like separator (the term excluding the configurations disclosed in Hasebe, such as a cylindrical can battery, which do provide separators but not in the shape of a bag) wherein the combination of elements provides for an arrangement such that the amount of electrolyte (mg) per unit area of separator (cm²) is greater than or equal to 41.

This relationship provides for a greater amount of electrolyte to be disposed in the separator and since the increased amount of electrolyte in the cell reduces electrolyte exhaustion from the separator even when the discharging and charging cycles are repeated, the cell exhibits improved self-discharging characteristics (see page 2, ll. 24-35 and Table 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
